

**ACA International LLC**

## Our Company

In addition to our specialization in air charters, ACA provides end to end project freight forwarding solutions in support of companies across industries with airfreight, ocean freight, trucking, and rail services. We provide you with expertise in the handling of oversized, overweight, breakbulk or restricted cargoes door to door. Our network of trusted project partners ensures exceptional service worldwide.

### Packing, Crating, Lashing, Loading

Getting cargo from point A to point B in good condition requires that it is properly packed, and secured to the transport vessel prior to departure. With our team you and your customers can rest easy knowing that our expert packers, loaders, and stevedores are capable of handling your specialized cargo with the utmost care.

### Project / Route Survey

Our experience in project management allows us to offer surveys on both project and routing feasibility for a particular scope of movement. Surveys help to avoid additional delays and costs by exploring and resolving issues that may come up prior to dispatch of your shipment.

### Specialized Airfreight

As a stand-alone service or multi-modal in combination with an air charter or surface transportation, ACA provides airfreight services with a network of airlines reaching destinations worldwide.

### Class 1 and 7 Door to Door Handling

With Class 1 and 7 hazardous materials you need experts you know you can count on to help ensure your cargo arrives to your destination in compliance with international regulations. Our team of specialists is able to offer solutions for DG cargo that is not suitable for loading on scheduled air or ocean shipments.

### Heavy Haul and Specialized Inland Trucking

When your pieces are too large, valuable, or hazardous to transit on your regular trucking vendors our specialized network can get the job done.

### Port Handling / Attendance at Port Operations

Whether coordination of cargo receipt and loading, or cargo storage and transfer/discharging our team navigates the intricacies of coordinating with ports and carriers to keep your cargo moving as efficiently as possible.

### Customs & Cargo Documentation

We provide alongside and on-board issued documentation to ensure proper clearance at the port of export and import.

### Barge / Rail Coordination

The last mile is always the hardest to complete on project cargo shipments and our network of barge and rail operators can help decrease the amount of over the road travel required and close the delivery gap.

### Breakbulk / RORO Ocean Freight

When your cargo can't load into a container or you want to decrease the amount of handling on wheeled freight breakbulk and RORO ocean freight are the best options. Our network of carriers allows us to offer global coverage while maintaining the level of customer service our project customers expect.
